Highlights

- We see total revenue of \$97.2B in 2026 and \$99.1B in 2027. In Q2 2026, C reported record quarterly revenue of \$24.8B [+14% Y/Y]. Services delivered \$6.4B [+18% Y/Y], led by Treasury and Trade Solutions at \$4.7B [+18% Y/Y] on higher deposits and 13% cross-border transaction growth. Markets revenues of \$7.0B [+17% Y/Y] were driven by Equities surging 45% Y/Y to \$2.3B. Banking rose 34% Y/Y to \$1.9B, with Investment Banking up 44% Y/Y on strong ECM [+92% Y/Y] and DCM [+65% Y/Y].
- C generated exceptional operating leverage of 960 bps in Q2 2026, with expenses rising only 5% Y/Y against 14% revenue growth, driving efficiency ratio to 57.4% [-530 bps Y/Y]. Services achieved RoTCE of 30.9%, while Banking improved to 18.0% from 4.1%. Q2 2026 RoTCE of 13.0% tracks above management's 10%-11% target. AI adoption across 80% of employees is driving efficiencies with 42M interactions.
- We raised EPS estimates to \$11.50 for 2026 and \$12.65 for 2027. C launched a \$30B buyback program, returning ~\$5.0B in Q2 2026 [92% payout ratio]. Management expects a 12% dividend increase. Net income of \$5.8B [+45% Y/Y] reflects strong execution post-transformation, with management reaffirming 10%-11% RoTCE guidance.

Investment Rationale/Risk

- We maintain a 3-STARs Hold rating. C is executing well with leading Services franchise, completed transformation, and strong operating leverage. Services operates with 44% efficiency delivering recurring revenues. Headcount declined to 219k [-5% Y/Y] with AI driving efficiencies. The bank has solid balance sheet with 12.8% CET1 ratio and strong liquidity positioning it for growth.
- Risks include macroeconomic uncertainties from U.S.-Iran conflict triggering inflation and lower consumer confidence, affecting credit card income. C has highest non-U.S. revenue exposure among peers, creating geopolitical risk. Economic downturn could tighten credit standards and increase reserves. Challenging to maintain outside Markets performance, and U.S. Consumer Cards showing lower transaction volumes.
- On July 14, we raised our target to \$143 using forward 2026 P/E of 12.4x vs. three-year average of 11.0x. Shares outperformed [+15% YTD, +53% 12-month]. Valuation risk stems from macro conditions outside U.S. where C has more exposure than peers. Transformation completion positions C well, though macro trends will determine growth and profitability. The bank did announce a 12% dividend increase beginning Q3 2026.

Analyst's Risk Assessment

LOW	MEDIUM	HIGH
-----	--------	------

Our risk assessment reflects our view of C's exposure to uncertain credit conditions, offset by improvements the bank has made to capital levels, credit quality, and earnings stability. We believe C will benefit from growth in the U.S. economy, although it has the highest percentage of non-U.S. revenue compared to peers. Changes to interest rates could adversely affect C's results of operations. Macroeconomic, geopolitical and other challenges could have a negative impact on the bank's performance or financial outlook. Credit risk and concentrations of risk can increase the potential for C to incur significant credit losses.

Citigroup Inc.

Business Summary Jul 14, 2026

Corporate Overview. Citigroup’s [C] history dates back to the founding of the City Bank of New York in 1812, and it currently does business in nearly 160 countries. C’s goal is to be the preeminent banking partner for institutions with cross-border needs, a global leader in wealth management, and a valued personal bank in the U.S. market. Management has revamped the reporting business segments that are disclosed below.

Services accounted for 25% of total net revenues in 2025, and it includes TTS and Securities Services. TTS provides an integrated suite of tailored cash management, trade, and working capital solutions to multinational corporations, financial institutions, and public sector organizations. Securities Services provides cross-border support for clients, providing on-the-ground local market expertise, post-trade technologies, customized data solutions, and a wide range of securities services solutions that can be tailored to meet clients’ needs. In 2025, the Services unit contributed 51% of total segment income from operations.

Markets [26%] includes mostly the trading of principal transactions, brokerage commission fees, and investment banking fees. The largest activity for the bank is fixed income, currency, and commodity [FICC] trading, which represents 74% of total segment revenue, while equity markets represents 26%. The range of services includes market-making across asset classes, risk management solutions, financing, prime brokerage, research, securities clearing, and settlement. The Markets segment’s international presence is supported by trading floors in approximately 80 countries and a proprietary network in 95 countries and jurisdictions. By geography, Markets’ revenue mix was 38% in North America and 62% International. In 2025, Markets contributed 39% of total segment income from operations.

Banking [8%] includes the Investment Banking unit, which supports clients’ capital-raising needs to help strengthen and grow their businesses, including equity and debt capital markets-related strategic financing solutions, as well as advisory services related to mergers and acquisitions, divestitures, restructurings, and corporate defense activities; and the Corporate Lending unit, which includes corporate and commercial banking, and serves as the conduit for the bank’s full product suite to clients. As of December 31, 2025, Banking had \$152 billion in assets. Total noninterest income revenue, or investment banking fees, is broken out by advisory or M&A fees [41%], equity underwriting fees [15%], and debt underwriting fees [44%]. In 2025, the Banking segment had \$1.5 billion in operating income.

U.S. Personal Banking [25%], or USPB, includes Branded Cards and Retail Services, which have proprietary card portfolios [Cash, Rewards, and Value] and co-branded card portfolios [including Costco and American Airlines] within Branded Cards, as well as co-brand and private label relationships within Retail Services [including, among others, The Home Depot, Best Buy, Sears, and Macy’s]. USPB also includes Retail Banking, which provides traditional banking services to retail and small business customers. As of December 31, 2025, USPB had over 655 retail bank branches concentrated in the six key metropolitan areas of New York, Chicago, Los Angeles, San Francisco, Miami, and Washington, D.C. The USPB unit contributed 21% of total segment income from operations.

Wealth [10%] includes Private Bank, Wealth at Work, and Citigold, and provides financial services to a range of client segments including affluent, high-net-worth and ultra-high-net-worth clients through banking, lending, mortgages, investment, custody, and trust product offerings in 20 countries, including the U.S., and four wealth management centers: Singapore, Hong Kong, UAE, and London. Private Bank provides financial services to ultra-high-net-worth clients through customized product offerings. Wealth at Work provides financial services to professionals in various industries [including law firms, consulting groups, accounting, and asset management]. Citigold includes Citigold and Citigold Private Clients; both provide financial services to affluent and high-net-worth clients. The Wealth unit contributed 10% of total segment income from operations.

All Others – Managed Basis [6%] includes activities not assigned to the reportable operating segments [Services, Markets, Banking, USPB, and Wealth], including Legacy Franchises and Corporate/Other. It excludes consumer bank divestitures in Asia and the exit in 2025 of its Mexico consumer and small business banking. This segment realized a net operating loss of \$4.4 billion in 2025.

Financial Trends. C’s key capital metrics for the Common Equity Tier 1 [CET1] capital ratio were 13.2% in Q4 2025, compared to 13.6% in Q4 2024. Its Supplementary Leverage Ratio [SLR] was 5.5% in Q4 2025 vs. 5.9% a year ago in Q4 2024. Capital requirements should come down with C’s simplification efforts, restructuring benefits, and execution. C returned almost \$17.5 billion in capital to its common shareholders in 2025, including \$13.25 billion in share repurchases.

Citigroup Inc.

Sub-Industry Outlook

We have a neutral opinion on the diversified banks sub-industry. The U.S. economy is likely to be a key driver of bank performance, and geopolitical risks may create market uncertainty. Diversified banks vary in their total net revenue mix between net interest income and non-net interest income contributions, underscoring diverse underlying businesses.

Net interest income (NII) has different contributions for the global U.S. banks. In 2026, we expect an easing in Y/Y changes for NII as we monitor net interest margin (NIMs) and interest rate spread between the bank source and use of funds. The 10-year Treasury yield is a key indicator for setting long-term interest rates for small business loans, auto loans, and conventional 30-year mortgages. A rising (or declining) yield reflects U.S. economic growth and inflation trends.

Non-interest income is expected to show Y/Y growth for 2026. Our investment thesis is that non-NII has strategic importance as a diversification tool compared to NII contributions. The fundamental appeal of non-NII is its perceived independence from the interest rate cycle, although there are non-NII streams that are sensitive to the rate and economy. Recurring fee-based areas can buffer volatility with market-driven income areas. One area that may show slower growth in 2026 is debit and credit card income and payment fees, if credit card transaction volume declines Y/Y.

Credit loan quality is stable, but we expect a higher provision of loan losses in consumer loans like credit cards. We see no distressed industries among commercial and industrial (C&I) loans, and the banks' earnings calls will address rising consumer loan delinquencies, particularly rising credit card loan balances and transaction volume. Private credit and bank lending to alternative asset managers continues to be top of mind for investors and the media.

The Federal Reserve Bank released its annual bank tests in June 2026. The reviews were favorable for the 32 U.S. banks undergoing the stress tests and capital requirements. All of the global U.S. banks

are globally systemically important banks (GSIBs) because they are large, interconnected, and complex, meaning that their failure could trigger a systemic collapse of the broader financial system — leading not just a single institution failing, but a cascading crisis affecting the entire global economy. They are sometimes called the "too big to fail" banks.

We are watching for signs that banks need to respond to deposit outflows and keep rates competitive on CDs and savings accounts. In 2026, this is especially important, with rates potentially seeing increases if inflation remains elevated, in our opinion. These banks are likely to be more restrictive on new loan origination if the U.S. economy slows down. The type of assets earning interest for these banks can vary from mortgages to auto, personal, commercial & industrial, and commercial real estate. The amount of NII will depend on the credit risk quality of the loan portfolio and varied interest rates for each type of loan.

More difficult to measure is digital banking, which has reduced the friction that historically kept deposits sticky. We think this may underestimate actual outflow risk compared to historical deposit runoff assumptions. In 2025, the sub-industry was up 32.1%, while the S&P 500 delivered a 16.4% gain. As of July 2, 2026, the S&P Composite 1500 Diversified Banks Index was up 5.9% YTD, while the S&P Composite 1500 was up 9.4%.

Citigroup Inc.

Analyst Research Notes and other Company News

July 14, 2026

05:16 PM ET... CFRA Maintains Hold Rating on Shares of Citigroup, Inc. [C 132.85***]:

We raise our target price by \$10 to \$143 per share, using a wider equity risk premium and a forward 2026 P/E of 12.4x, compared to the three-year historical average of 11.0x. We raise our EPS estimates by \$0.65 to \$11.50 for 2026 and by \$0.45 to \$12.65 for 2027, on revenue projections of \$97.2B [prior \$93.4B] and \$99.1B [prior \$96.4B], respectively. C's shares have been outperforming the peer group [+15% YTD and +53% in the last 12 months]. Following strong first half 2026 results, we think it will be challenging to reach outsize performance in Markets [trading services], which more than offsets any weakness in traditional banking. The bank's other businesses in Services and Wealth are not expected to deliver outsized performance. We think US Consumer Cards is beginning to see signs of lower card transaction volumes that may slow down the pace of card income from net interest income loan balances and services charges. Nonetheless, Markets and Banking are the key areas to support higher growth. / Kenneth Leon

July 14, 2026

10:17 AM ET... Citigroup Inc. Delivers Earnings and Revenue Beat in Q2 2026 [C 140.71***]:

Citigroup reported strong Q2 2026 results with net income of \$5.8B [+45% Y/Y] and EPS of \$3.15 on revenue of \$24.8B [+14% Y/Y], marking the strongest quarterly revenue in a decade. RoTCE reached 13.0% [+430 bps Y/Y], exceeding management's 10%-11% full-year target, while operating leverage improved 960 bps as expenses rose only 5% against 14% revenue growth. We believe the combination of record Services performance, continued Equities momentum, and recovering Banking franchise positions Citi favorably for H2 2026. Management launched a \$30B buyback program and returned \$5.0B to shareholders in Q2 alone. We expect continued strength driven by Services segment delivering highest-ever quarterly revenue of \$6.4B [+18% Y/Y] with RoTCE surpassing 30%, while Markets revenues of \$7.0B [+17% Y/Y] benefited from 45% Equities growth. The CET1 ratio improved to 12.8% and TBVPS increased to \$100.89, reflecting strong capital position to absorb external shocks, in our view. / Kenneth Leon

May 18, 2026

02:48 PM ET... CFRA Lowers Rating to Hold From Buy on Shares of Citigroup, Inc. [C 122.65***]:

We lower our target price \$17 to \$133, using a narrower equity risk premium and a forward 2026 P/E of 12.3x vs. the three-year historical average of 11.3x. We reduce our 2026 EPS by \$0.45 to \$10.85 and 2027's by \$0.30 to \$12.20 on revenue projections of \$93.4B and \$96.4B, respectively. C's shares have outperformed the peer group [+5% YTD and +62% in the last 12 months]. Following strong Q1 2026 results, we think it will be challenging to reach outsize performance in Markets [trading services], which more than offsets weakness in Banking. We believe macroeconomic trends may face uncertainties from the U.S.-Iran conflict that could trigger tail risks including inflationary pressures and lower consumer confidence. Should we see a U.S. economic slowdown, we believe loan transaction volumes may ease, affecting credit card income and commercial loan activity. Given that the bank's multiyear restructuring is complete, macroeconomic trends will determine top-line growth and profitability, both of which face risks. / Kenneth Leon

April 14, 2026

12:18 PM ET... CFRA Reiterates Buy Opinion on Shares of Citigroup Inc. [C 130.00***]:

We raise our target price by \$10 to \$150 applying a forward P/E of 13.2x that is near the midpoint of the historical averages for three years at 15.1x and five years at 11.9x on forward normalized earnings. We are confident C is well positioned to accelerate growth and performance. Looking ahead for 2026, we believe there is ample market opportunity to exceed consensus expectations on revenue growth and wider margins for all businesses. We are increasing our 2026 EPS estimate by \$1.55 to \$11.30 and 2027's by \$0.80 to \$12.50 on projected revenue of \$93.5B [prior \$88.3B] and \$98.5B [\$92.0B]. We moved to a new valuation level on price to NTBV at a premium of 1.5x, which is still below direct peers trading anywhere from 1.7x to 2.5x. We see upside to our target based on C's leading position in treasury securities services and its position as one of the top-five players in investment banking. Valuation risk may rest with a change in macroeconomic conditions outside the U.S., where C has more exposure than peers. / Kenneth Leon

April 14, 2026

09:11 AM ET... Citigroup Inc. Outpaces Q1 2026 Earnings Expectation [C 124.39***]:

Citigroup [C] reported a strong Q1 2026 earnings beat with adjusted EPS of \$3.06 versus consensus estimate of \$2.63 per share, or \$1.96 a year ago. Total revenue of \$24.6B exceeded consensus expectations, due to robust 14% Y/Y growth across all business segments. Net interest income increased 12% Y/Y, with notable gains in U.S. Personal Banking, Markets, Wealth, and Services segments, partly offset by declines in All Other and Banking segments. Total non-interest revenue surged 39% Y/Y, supported by strong gains across all businesses including Services, Markets, Banking, Wealth, and U.S. Consumer Cards. The broad-based revenue growth across multiple segments demonstrates the bank's diversified business model strength and operational effectiveness. Strong performance in both interest and non-interest income streams positions C well for continued positive momentum. The significant outperformance versus consensus expectations across key financial metrics reflects successful execution across the global franchise. / Kenneth Leon

January 15, 2026

12:27 AM ET... CFRA Reiterates Buy Opinion on Shares of Citigroup Inc. [C 112.41***]:

Our target price of \$140 applies a wider risk premium and a forward P/E multiple of 14.4x compared to the three-year historical average of 11.5x normalized earnings. We believe management's success with the multiyear restructuring and transformation strategy enables C to realize higher earnings growth and ROE. We are confident C is well positioned to accelerate growth and performance. Looking ahead in 2026, we believe there is ample market opportunity to exceed consensus expectations on revenue growth and wider margins for all businesses. We think that we have moved to a new valuation level on price to NTBV at a premium of 1.4x, which is still below direct peers trading anywhere from 1.7x to 2.5x. We keep our 2026 EPS estimate at \$9.75 and start 2027's at \$11.70. As such, the valuation gap against the current share price deserves to be closer to peers. We see upside to our target based on C's leading position in treasury securities services and its position as one of the top five players in investment banking. / Kenneth Leon

January 14, 2026

09:15 AM ET... Citigroup Q4 2025: Solid Performance Amid Diverse Business Segment Growth [C 116.30***]:

C reported Q4 2025 adjusted EPS of \$1.81, beating the consensus estimate of \$1.62, while total revenue of \$19.9B represented a significant miss against consensus expectations despite 6% Y/Y growth across all business segments. Net interest income (NII) increased 14% Y/Y with notable gains in U.S. Personal Banking, Markets, Wealth, and Services segments, partly offset by declines in All Other and Banking segments. Total non-interest revenue declined substantially by 27% Y/Y, primarily led by decreases in discontinued Legacy Franchise Markets, U.S. Private Banking, and Wealth operations, partially offset by increases in Banking and Services. The mixed quarterly results highlight the ongoing challenges in C's comprehensive strategic business transformation efforts, with core banking operations demonstrating resilience through strong NII growth, while the legacy franchise winds down activities. We think a stable U.S. economy with moderate growth should support positive loan growth and controlled credit risk. / Kenneth Leon

Forecasts are not reliable indicator of future performance.

Note: A company's earnings outlook plays a major part in any investment decision. S&P Global Market Intelligence organizes the earnings estimates of over 2,300 Wall Street analysts, and provides their consensus of earnings over the next two years, as well as how those earnings estimates have changed over time. Note that the information provided in relation to consensus estimates is not intended to predict actual results and should not be taken as a reliable indicator of future performance.

Note: For all tables, graphs and charts in this report that do not cite any reference or source, the source is S&P Global Market Intelligence.

Wall Street Consensus Opinion

Buy/Hold

Wall Street Consensus vs. Performance

For fiscal year 2026, analysts estimate that C will earn USD 11.15. For fiscal year 2027, analysts estimate that C's earnings per share will grow by 15.5% to USD 12.88.

Citigroup Inc.**Glossary****STARS**

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index [MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index]], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsule the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share [EPS] estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics.

Abbreviations Used in Equity Research Reports

CAGR - Compound Annual Growth Rate
 CAPEX - Capital Expenditures
 CY - Calendar Year
 DCF - Discounted Cash Flow
 DDM - Dividend Discount Model
 EBIT - Earnings Before Interest and Taxes
 EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
 EPS - Earnings Per Share
 EV - Enterprise Value
 FCF - Free Cash Flow
 FFO - Funds From Operations
 FY - Fiscal Year
 P/E - Price/Earnings
 P/NAV - Price to Net Asset Value
 PEG Ratio - P/E-to-Growth Ratio
 PV - Present Value
 R&D - Research & Development
 ROCE - Return on Capital Employed
 ROE Return on Equity
 ROI - Return on Investment
 ROIC - Return on Invested Capital
 ROA - Return on Assets
 SG&A - Selling, General & Administrative Expenses
 SOTP - Sum-of-The-Parts
 WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes [paid in the country of origin].

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:**★★★★★ 5-STARS (Strong Buy):**

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five (six) model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
