Highlights

- We forecast \$220.0B revenue in 2026 and \$240.0B in 2027, driven by strong U.S. economy (75%-77% of net revenue) boosting loan volume. JPM is gaining wallet share across businesses. Commercial & Investment Bank revenue was \$24.9B [+27% Y/Y] with investment banking fees at \$3.3B [+30% Y/Y], highest since 2021. Asset & Wealth Management posted AUM of \$5.1T [+18% Y/Y] with \$50B net inflows. Consumer & Community Banking delivered \$20.3B revenue [+8% Y/Y].
- NII remained resilient at \$25.6B [+10% Y/Y] despite lower rates, with \$105B firmwide guidance. Net interest spread was 1.93% versus 1.89% prior year. Total loans rose 10% Y/Y led by credit card [+7%] and wholesale loans [+15%]. Card Services net charge-off rate was 3.34%. Diversified funding base and loan growth offset rate headwinds.
- JPM reported Q2 2026 net income of \$21.2B (\$7.70 EPS), beating consensus \$5.79, up 41% Y/Y. Core EPS was \$6.14 excluding gains [+13% Y/Y]. We raised 2026 EPS by \$1.20 to \$24.20 and 2027's by \$1.25 to \$25.00. Capital returned totaled \$10.2B [\$4.0B dividend + \$6.2B buybacks], 73% payout ratio. Leadership changes include Doug Petno and Troy Rohrbaugh as Co-Presidents, but Jamie Dimon is expected to be around for many years.

Investment Rationale/Risk

- Our Buy rating reflects JPM's diversified model and fundamental strength. U.S. economy will drive revenue growth, with higher fee income from asset management and investment banking as catalysts. Fortress-like capital position supports strong returns. We expect accelerating transaction growth in capital markets supporting investment banking fees, especially equity underwriting and M&A advisory. Management changes clarify succession planning.
- Risks include global recession, slower corporate borrowing, and weak loan demand. The bank faces interest rate volatility and weaker customer demand. Investment banking and trading are cyclical businesses subject to geopolitical and monetary risks. Iran-U.S. conflict escalation could damage labor market and consumer credit health. Private credit underwriting standards and cybersecurity risks pose challenges.
- We raised our target by \$10 to \$375, using forward P/E of 16.0x our 2026 earnings estimate, above three-year average of 13.2x. This reflects expected P/E expansion from revenue and EPS growth over 12-18 months. We anticipate JPM will benefit from constructive regulation and higher capital returns. Superior earnings growth should support multiple

Analyst's Risk Assessment

LOW	MEDIUM	HIGH
-----	--------	------

Our assessment reflects our view of the bank's strong balance sheet, diversified lines of business, and strong capital ratios. JPM's geographic and product diversity provide significant protection from a local and regional downturn. The bank has exposure to areas of economic weakness, such as interest rate volatility and weaker loan demand from both consumer and commercial customers. Investment banking and markets trading are both cyclical businesses, whereby it is difficult to forecast geopolitical, monetary, and interest rate risks.

Business Summary Jul 14, 2026

Corporate Overview. JPM is one of the world’s leading investment banks, with clients consisting of corporations, financial institutions, governments, and institutional investors worldwide. Its products and services include advising on corporate strategy and structure, equity and debt capital raising, sophisticated risk management, research, market making in cash securities and derivative instruments, and prime brokerage and research.

Corporate & Investment Banking (CIB) offers a broad suite of investment banking, market-making, prime brokerage, treasury, and securities products and services to a global client base of corporations, investors, financial institutions, government, and municipal entities. This reporting segment provides a full range of products and services related to advising on corporate strategy and structure, capital-raising in equity and debt markets, and loan origination and syndication. This segment also includes Treasury Services, which provides transaction services consisting of cash management and liquidity solutions.

Commercial Banking provides lending, treasury services, investment banking, and investment management services to corporations, municipalities, financial institutions, and not-for-profit entities. Treasury Securities Services offers transaction, investment, and information services to support the needs of corporations, issuers, and institutional investors worldwide.

Asset & Wealth Management (AWM) provides investment management to retail and institutional investors, financial intermediaries, and high-net-worth families and individuals globally. AWM clients include institutions, high-net-worth individuals, and retail investors in major markets throughout the world. AWM offers investment management across most major asset classes, including equities, fixed income, alternatives, and money market funds. AWM also offers multi-asset investment management, providing solutions for a broad range of clients’ investment needs. For Wealth Management clients, AWM also provides retirement products and services, brokerage, and banking services, including trusts and estates, loans, mortgages, and deposits.

Consumer & Community Banking (CCB) offers services to consumers and businesses through bank branches, ATMs, digital (including mobile and online), and telephone banking. CCB is organized into Consumer & Business Banking (including Consumer Banking/Chase Wealth Management and Business Banking), Home Lending (including Home Lending Servicing and Real Estate Portfolios), and Card, Merchant Services, and Auto. Consumer & Business Banking offers deposit and investment products and services to consumers, and lending, deposit, and cash management and payment solutions to small businesses. Home Lending includes mortgage origination and servicing activities, as well as portfolios consisting of residential mortgages and home equity loans.

Impact of Major Developments. In September 2008, JPM purchased all the assets and certain liabilities of Washington Mutual from the FDIC for \$1.9B. The acquisition significantly expanded JPM’s footprint, particularly in California. Earlier, JPM acquired Bear Stearns in a stock-for-stock exchange, completed in May 2008.

On May 1, 2023, JPM agreed to purchase from the FDIC the majority of assets from First Republic Bank, \$92B of total deposits including \$30B of large bank deposits put there in April, and certain liabilities. Key terms of the transactions are receiving most of First Republic Bank’s assets including \$173B of loans and \$30B of securities. As noted, FDIC is providing JPM with a loss share agreement covering acquired single-family residential mortgage loans and commercial loans as well as \$50B of five-year, fixed-rate term financing. We think this was a clean deal because JPM did not assume the corporate debt or preferred stock for this bankrupt bank. All of the legacy First Republic branches opened in May 2023 as JPMorgan Chase banks. JPM booked a one-time \$2.6B post-tax gain that does not reflect \$2.0B of post-tax restructuring costs.

Legal/Regulatory Issues. The Bank Holding Company Act generally restricts JPM and other banks from engaging in business activities other than the business of banking and certain closely related activities. Financial holding companies generally can engage in a broader range of financial activities that are otherwise permissible for BHCs, including underwriting, dealing and making markets in securities, and making merchant banking investments in non-financial companies.

Financial Trends. As of December 31, 2025, JPM’s tangible book value per share was \$107.56, up from \$97.30, or +11% in 2025, and its Basel III common equity Tier I capital was 15.5% vs. 16.8%. In 2025, JPM’s total gross loans to total deposits was 55%, comparable to 2024. We think loan activity is likely to grow in 2026, with lower Fed funds rates, increased commercial demand for capital plans, and consumer loans picking up with reduced savings. Credit risk will be monitored. In July 2025, JPM’s board of directors authorized a 7.1% dividend increase. The next dividend increase is expected in July 2026 after the Fed’s stress test results are released.

Regarding 2026 forward guidance, JPM expects NII, including Markets, to be \$95.0B vs. \$92.6B in 2025, excluding Market activity. We think the NII guidance is reasonable considering our macroeconomic outlook. We are assuming two rate cuts in 2026 by the Federal Reserve Bank that may see a pause if the U.S. economy remains strong. To offset the lower rates impact on NII, interest rate spreads may remain healthy and depend on loan volume and loan balances outstanding. On adjusted noninterest expense, JPM is forecasting a \$105B increase in 2026 [\$95.3B in 2025] related to volume and revenue-related growth, investment in technology, expanding into new U.S. metropolitan markets, and higher compensation expense. There has been some credit tightening in areas like commercial real estate loans, where the majority of JPM’s loan book is multi-family lending, not office buildings. Card services is expected to see a 3.4% net charge-off of outstanding card balances in 2026 with new guidance.

JPMorgan Chase & Co.

Sub-Industry Outlook

We have a neutral opinion on the diversified banks sub-industry. The U.S. economy is likely to be a key driver of bank performance, and geopolitical risks may create market uncertainty. Diversified banks vary in their total net revenue mix between net interest income and non-net interest income contributions, underscoring diverse underlying businesses.

Net interest income (NII) has different contributions for the global U.S. banks. In 2026, we expect an easing in Y/Y changes for NII as we monitor net interest margin (NIMs) and interest rate spread between the bank source and use of funds. The 10-year Treasury yield is a key indicator for setting long-term interest rates for small business loans, auto loans, and conventional 30-year mortgages. A rising (or declining) yield reflects U.S. economic growth and inflation trends.

Non-interest income is expected to show Y/Y growth for 2026. Our investment thesis is that non-NII has strategic importance as a diversification tool compared to NII contributions. The fundamental appeal of non-NII is its perceived independence from the interest rate cycle, although there are non-NII streams that are sensitive to the rate and economy. Recurring fee-based areas can buffer volatility with market-driven income areas. One area that may show slower growth in 2026 is debit and credit card income and payment fees, if credit card transaction volume declines Y/Y.

Credit loan quality is stable, but we expect a higher provision of loan losses in consumer loans like credit cards. We see no distressed industries among commercial and industrial (C&I) loans, and the banks' earnings calls will address rising consumer loan delinquencies, particularly rising credit card loan balances and transaction volume. Private credit and bank lending to alternative asset managers continues to be top of mind for investors and the media.

The Federal Reserve Bank released its annual bank tests in June 2026. The reviews were favorable for the 32 U.S. banks undergoing the stress tests and capital requirements. All of the global U.S. banks

are globally systemically important banks (GSIBs) because they are large, interconnected, and complex, meaning that their failure could trigger a systemic collapse of the broader financial system — leading not just a single institution failing, but a cascading crisis affecting the entire global economy. They are sometimes called the "too big to fail" banks.

We are watching for signs that banks need to respond to deposit outflows and keep rates competitive on CDs and savings accounts. In 2026, this is especially important, with rates potentially seeing increases if inflation remains elevated, in our opinion. These banks are likely to be more restrictive on new loan origination if the U.S. economy slows down. The type of assets earning interest for these banks can vary from mortgages to auto, personal, commercial & industrial, and commercial real estate. The amount of NII will depend on the credit risk quality of the loan portfolio and varied interest rates for each type of loan.

More difficult to measure is digital banking, which has reduced the friction that historically kept deposits sticky. We think this may underestimate actual outflow risk compared to historical deposit runoff assumptions. In 2025, the sub-industry was up 32.1%, while the S&P 500 delivered a 16.4% gain. As of July 2, 2026, the S&P Composite 1500 Diversified Banks Index was up 5.9% YTD, while the S&P Composite 1500 was up 9.4%.

JPMorgan Chase & Co.

Analyst Research Notes and other Company News

July 14, 2026

04:57 PM ET... CFRA Reiterates Buy Opinion on Shares of JPMorgan Chase & Co. [JPM 341.00****]:

We raise our target price by \$10 to \$375, using a forward P/E of 16.0x our 2026 EPS estimate that is in line with 2025 and above the three-year historical average of 13.2x on operating earnings. We increase our EPS estimates in 2026 by \$1.20 to \$24.20 and 2027's by \$1.25 to \$25.00 on projected revenue of \$220.0B [prior \$195.9B] and \$240.0B [\$203.7B], respectively. Both our EPS and revenue estimates take into account the seasonal swing across JPM's businesses, but AI-driven investment banking reflects secular growth. Despite worries surrounding the Iran-U.S. conflict, we are positive on the outlook for capital markets in 2026, which should favorably impact investment banking fees [equity underwriting and M&A advisory fees], and an elevated equity market bolstering management fee income for the Asset & Wealth Management segment. We think JPM and peers will benefit from more constructive bank regulations, as reflected in the Fed's June bank stress tests and regulated capital requirements. / Kenneth Leon

July 14, 2026

08:03 AM ET... JPMorgan Chase Delivers Strong Results in Q2 2026 [JPM 334.53****]:

JPM delivered strong Q2 2026 results with EPS of \$7.70 vs. the \$5.79 consensus and revenue of \$58.0B vs. the \$51.2B consensus, due to \$4.6B Visa gain and \$1.0B equity investment gains. Excluding significant items, EPS was \$6.14 [+13% Y/Y] with ROTCE of 23%, demonstrating broad-based organic momentum across all four business segments. Asset & Wealth Management showed exceptional growth with AUM rising 18% to \$5.14T and ROE expanding to 48% from 36% a year ago. The pending Apple Card acquisition will meaningfully expand the consumer lending franchise. NII remained resilient at \$25.6B [+10% Y/Y] despite the lower rate environment, supported by 10% loan growth and stable net interest spreads at 1.93%. Credit quality stayed stable with provisions down 12% Y/Y to \$2.5B and nonaccrual loans declining 5% across both consumer and wholesale portfolios. We believe JPM's diversified revenue streams and strong capital position support continued outperformance. JPM continues to be the market leader for traditional banks. / Kenneth Leon

June 25, 2026

10:57 AM ET... JPMorgan Chase Announces Key Leadership Changes and Succession Planning Moves [JPM 333.45****]:

JPM announced management changes with Doug Petno and Troy Rohrbaugh named Co-Presidents, while Petno becomes sole CEO of Commercial & Investment Bank and Rohrbaugh takes over Consumer and Community Banking as Marianne Lake retires. The streamlined senior leadership team maintains Mary Erdoes as Asset Management CEO and Jennifer Piepszak as COO, reporting to Jamie Dimon. We believe the cohesive chemistry of JPM's leadership has driven best-in-class industry performance across investment banking, asset management, and consumer/commercial banking over the past five years. We maintain our Buy rating and \$365 target price, viewing JPM as well-positioned to participate in alternative asset management as both principal and agent. We are positive on JPM's expanded focus on principal investments, highlighted by the January hiring of Todd Combs from Berkshire Hathaway to head the Strategic Investment Group, overseeing more than \$10B in direct investments in industries important to U.S. economic and national security. / Kenneth Leon

April 14, 2026

10:29 AM ET... CFRA Maintains Buy Rating on Shares of JPMorgan Chase & Co. [JPM 310.00****]:

We raise our target price by \$25 to \$365 using a forward P/E of 15.9x our 2026 earnings estimate that is near the three-year historical average of 16.1x on normalized earnings. We increase our EPS estimates in 2026 by \$1.00 to \$23.00 and 2027's by \$0.75 to \$23.75 on projected revenue of \$195.9B [prior \$192.0B] and \$203.7B [\$199.5B] respectively. Both our EPS and revenue estimates take into account the seasonal swing across JPM's businesses whereby the first quarter is historically the strongest period. Despite worries surrounding the Iran-U.S. conflict, we are positive on the outlook for the capital markets in 2026, which should favorably impact investment banking fees [equity underwriting and M&A advisory fees], and an elevated equity market bolstering management fee income for the Asset & Wealth Management segment. We anticipate that JPM and peers will benefit from more constructive bank regulation in the Fed's bank stress tests to be

released late June. We expect a higher return of capital. / Kenneth Leon

April 14, 2026

07:21 AM ET... JPM Delivers Earnings and Revenue Beat in Q1 2026 [JPM 309.87****]:

JPM delivered exceptional Q1 2026 results with EPS of \$5.94 [+17% Y/Y, +28% Q/Q] and net income of \$16.5B [+13% Y/Y, +27% Q/Q], with managed revenue of \$50.5B [+10% Y/Y] demonstrating strength across all segments. Strong ROE of 19% and ROTCE of 23% validated our investment thesis around capital markets positioning, with record CIB results including Markets revenue of \$11.6B [+20% Y/Y] and Investment Banking fees of \$2.9B [+28% Y/Y]. Management guided 2026 firmwide NII to \$103B and adjusted expenses to \$105B while maintaining cautious outlook on geopolitical tensions and economic uncertainties. We believe JPM's diversified business model and fortress-like balance sheet with CET1 of 14.5% position it well to navigate complex market conditions ahead. In our view, the bank's ability to generate substantial capital returns of \$13.0B while maintaining stable credit quality supports future outperformance, though we expect prudent management given ongoing geopolitical risks. Tangible book value was \$108.87, up 8% Y/Y. / Kenneth Leon

January 13, 2026

10:03 AM ET... CFRA Reiterates Buy Opinion on Shares of JPMorgan Chase & Co. [JPM 325.00****]:

We keep our \$340 target price assuming a forward P/E of 15.5x our 2026 earnings estimate that is above the five-year historical average of 15.0x on normalized earnings. We keep our 2026 EPS estimate at \$22 and start 2027 at \$23 on projected revenue of \$192B and \$199.5B, respectively. We are bullish on the outlook for the capital markets in 2026, which should favorably impact investment banking fees [equity underwriting and M&A advisory fees], and elevated equity market bolstering management fee income for the Asset & Wealth Management segment. Net interest spreads are positive despite lower rates, leading to JPM's guidance of net interest income (NII) at \$103B firm-wide and \$95B, ex-Markets segment [trading activities]. As a diversified bank, we like JPM's resilience and growth in both total loans and total deposits contributing to noninterest income and NII in 2026. We think 2026 will also be a solid year for return of capital [dividends and share repurchases], with ROTCE expected to be 18% or higher. / Kenneth Leon

January 13, 2026

08:21 AM ET... JPM Delivers Strong Beat on Adjusted EPS and a Slight Beat on Revenue [JPM 324.49****]:

JPM delivered strong Q4 2025 results, with revenue of \$46.8B and EPS of \$5.23 beating consensus estimates of \$46.2B and \$4.86. Adj-net income of \$14.7B was impacted by a \$2.2B credit reserve for the Apple card portfolio. Markets segment revenue +17% Y/Y to \$8.2B, supporting our investment thesis with Fixed Income +7% and Equity Markets +40%. Management provided 2026 guidance targeting firmwide NII of \$103B and adj-expenses of \$105B, with card NCO rate at 3.4%. NII +7% Y/Y despite lower rates, offset by higher deposit balances and card revolving balances. Total loans +9% Y/Y, led by credit cards and wholesale lending, while deposits +6% Y/Y. We believe JPM's fortress-like capital position with a CET1 ratio of 14.5% and \$13B in capital returns demonstrates strong excess capital generation. In our view, the bank's diversified model positions it well to navigate economic uncertainties, though we expect softening job growth may impact household credit risk ahead. We see favorable capital markets ahead in 2026. / Kenneth Leon

Wall Street Consensus Opinion

Buy/Hold

Wall Street Consensus vs. Performance

For fiscal year 2026, analysts estimate that JPM will earn USD 24.21. For fiscal year 2027, analysts estimate that JPM's earnings per share will grow by 3.28% to USD 25.01.

JPMorgan Chase & Co.

Glossary

STARS

Since January 1, 1987, CFRA Equity and Fund Research Services, and its predecessor S&P Capital IQ Equity Research has ranked a universe of U.S. common stocks, ADRs [American Depositary Receipts], and ADSs [American Depositary Shares] based on a given equity's potential for future performance. Similarly, we have ranked Asian and European equities since June 30, 2002. Under proprietary STARS [Stock Appreciation Ranking System], equity analysts rank equities according to their individual forecast of an equity's future total return potential versus the expected total return of a relevant benchmark [e.g., a regional index [MSCI AC Asia Pacific Index, MSCI AC Europe Index or S&P 500® Index]], based on a 12-month time horizon. STARS was designed to help investors looking to put their investment decisions in perspective. Data used to assist in determining the STARS ranking may be the result of the analyst's own models as well as internal proprietary models resulting from dynamic data inputs.

S&P Global Market Intelligence's Quality Ranking

[also known as **S&P Capital IQ Earnings & Dividend Rankings**] - Growth and S&P Capital IQ Earnings & Dividend Rankings stability of earnings and dividends are deemed key elements in establishing S&P Global Market Intelligence's earnings and dividend rankings for common stocks, which are designed to capsule the nature of this record in a single symbol. It should be noted, however, that the process also takes into consideration certain adjustments and modifications deemed desirable in establishing such rankings. The final score for each stock is measured against a scoring matrix determined by analysis of the scores of a large and representative sample of stocks. The range of scores in the array of this sample has been aligned with the following ladder of rankings:

A+ Highest	B Below Average
A High	B- Lower
A Above	C Lowest
B+ Average	D In Reorganization
NC Not Ranked	

EPS Estimates

CFRA's earnings per share [EPS] estimates reflect analyst projections of future EPS from continuing operations, and generally exclude various items that are viewed as special, non-recurring, or extraordinary. Also, EPS estimates reflect either forecasts of equity analysts; or, the consensus [average] EPS estimate, which are independently compiled by S&P Global Market Intelligence, a data provider to CFRA. Among the items typically excluded from EPS estimates are asset sale gains; impairment, restructuring or merger-related charges; legal and insurance settlements; in process research and development expenses; gains or losses on the extinguishment of debt; the cumulative effect of accounting changes; and earnings related to operations that have been classified by the company as discontinued. The inclusion of some items, such as stock option expense and recurring types of other charges, may vary, and depend on such factors as industry practice, analyst judgment, and the extent to which some types of data is disclosed by companies.

12-Month Target Price

The equity analyst's projection of the market price a given security will command 12 months hence, based on a combination of intrinsic, relative, and private market valuation metrics.

Abbreviations Used in Equity Research Reports

CAGR - Compound Annual Growth Rate
 CAPEX - Capital Expenditures
 CY - Calendar Year
 DCF - Discounted Cash Flow
 DDM - Dividend Discount Model
 EBIT - Earnings Before Interest and Taxes
 EBITDA - Earnings Before Interest, Taxes, Depreciation & Amortization
 EPS - Earnings Per Share
 EV - Enterprise Value
 FCF - Free Cash Flow
 FFO - Funds From Operations
 FY - Fiscal Year
 P/E - Price/Earnings
 P/NAV - Price to Net Asset Value
 PEG Ratio - P/E-to-Growth Ratio
 PV - Present Value
 R&D - Research & Development
 ROCE - Return on Capital Employed
 ROE Return on Equity
 ROI - Return on Investment
 ROIC - Return on Invested Capital
 ROA - Return on Assets
 SG&A - Selling, General & Administrative Expenses
 SOTP - Sum-of-The-Parts
 WACC - Weighted Average Cost of Capital

Dividends on American Depositary Receipts (ADRs) and American Depositary Shares (ADSs) are net of taxes [paid in the country of origin].

Qualitative Risk Assessment

Reflects an equity analyst's view of a given company's operational risk, or the risk of a firm's ability to continue as an ongoing concern. The Qualitative Risk Assessment is a relative ranking to the U.S. STARS universe, and should be reflective of risk factors related to a company's operations, as opposed to risk and volatility measures associated with share prices. For an ETF this reflects on a capitalization-weighted basis, the average qualitative risk assessment assigned to holdings of the fund.

STARS Ranking system and definition:

★★★★★ 5-STARS (Strong Buy):

Total return is expected to outperform the total return of a relevant benchmark, by a notable margin over the coming 12 months, with shares rising in price on an absolute basis.

★★★★★ 4-STARS (Buy):

Total return is expected to outperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 3-STARS (Hold):

Total return is expected to closely approximate the total return of a relevant benchmark over the coming 12 months.

★★★★★ 2-STARS (Sell):

Total return is expected to underperform the total return of a relevant benchmark over the coming 12 months.

★★★★★ 1-STAR (Strong Sell):

Total return is expected to underperform the total return of a relevant benchmark by a notable margin over the coming 12 months, with shares falling in price on an absolute basis.

Relevant benchmarks:

In North America, the relevant benchmark is the S&P 500 Index, in Europe and in Asia, the relevant benchmarks are the MSCI AC Europe Index and the MSCI AC Asia Pacific Index, respectively.

Disclosures

Stocks are ranked in accordance with the following ranking methodologies:

STARS Stock Reports:

Qualitative STARS rankings are determined and assigned by equity analysts. For reports containing STARS rankings refer to the Glossary section of the report for detailed methodology and the definition of STARS rankings.

Quantitative Stock Reports:

Quantitative rankings are determined by ranking a universe of common stocks based on 5 measures or model categories: Valuation, Quality, Growth, Street Sentiment, and Price Momentum. In the U.S., a sixth sub-category for Financial Health will also be displayed. Percentile scores are used to compare each company to all other companies in the same universe for each model category. The five (six) model category scores are then weighted and rolled up into a single percentile ranking for that company. For reports containing quantitative rankings refer to the Glossary section of the report for detailed methodology and the definition of Quantitative rankings.

STARS Stock Reports and Quantitative Stock Reports:

The methodologies used in STARS Stock Reports and Quantitative Stock Reports [collectively, the "Research Reports"] reflect different criteria, assumptions and analytical methods and may have differing rankings. The methodologies and data used to generate the different types of Research Reports are believed by the author and distributor reasonable and appropriate. Generally, CFRA does not generate reports with different ranking methodologies for the same issuer. However, in the event that different methodologies or data are used on the analysis of an issuer, the methodologies may lead to different views on the issuer, which may at times result in contradicting assessments of an issuer. CFRA reserves the right to alter, replace or vary models, methodologies or assumptions from time to time and without notice to clients.
